

ALOIA COLOUR COMPACT

The ALOIA recessed design luminaire is perfect for creating ascending lighting scenarios that indirectly enhance architectural structures, street furniture and trees. It integrates multi-configurable COLOUR COMPACT® LED optoelectronic technology with 4-channel DMX control system, APS® – Argon Pressurised System optical module pressurized with argon gas in an inert atmosphere with IP68 sealing, and an advanced heat dissipation system in AL5754 anodized aluminum. The outer material is 316 stainless steel and tempered optical glass, whose vitrified stripes can be adapted to any color of the RAL chart.
